

#MyVoice Governance Theme Week: Changes Needed

When asked what needed to improve about MFRC governance, most families noted: consistency; communication; and outreach

Consistency, communication and outreach beyond the physical base/MFRC proximity (it's three things, I know 😊)

At the board level, facilitation from MFS to allow boards to share best practices, successful programming, etc. That would eliminate time spent recreating the wheel by staff and board, and allow more time for strategic planning and vision.

Yes, utilizing the technology available and realizing that most military families live off base and many times at quite a distance from the base or MFRC.

(families engaged=46)
