### QUALITY OF LIFE

**Climate and potential for severe weather, natural disasters:**

- Although it occupies almost the same degrees of latitude as Alaska, Norway owes its warmer climate to the Norwegian Current (the northeastern extension of the Gulf Stream), which carries four to five million tons of tropical water per second into the surrounding seas. This current usually keeps the fjords from freezing, even in the Arctic Finnmark region. Even more important are the southerly air currents brought in above these warm waters, especially during the winter.
- Avalanches and rockslides present a risk in mountainous areas where the weather is highly unpredictable. Monitor local media and stay informed of weather patterns and warning levels before setting off on a trek. Also, a possibility of flash floods and debris blocking the roads, due to high winds. Check local weather network (<https://www.yr.no/>)
- Dark days in winter, long days in summer.
- The temperature in winter is around 0 to minus 10, in summer 10 –20 degrees.

**Laws and Culture:**

- Penalties for trafficking, use or possession, even of small amount, of illegal drugs are severe. Convicted offenders can expect heavy fines, detention or deportation. Deportation from Norway

- A visitor found in possession of drugs upon arrival in Norway will be charged with importation rather than simple possession.
